INTERNATIONAL PRELIMINARY
REPORT ON PATENTABILITY
(SEPARATE SHEET)

Re Item V

Reference is made to the following documents:

- D1: US 2003/196939 A1 (BINDER WALTER ET AL) 23 October 2003 (2003-10-23)
D2: WO 02/100511 A (UFI UNIVERSAL FILTER INTERNATIONAL S.P.A; GIRONDI, GIORGIO) 19 December 2002 (2002-12-19)
D3: US 5 589 060 A

The document D3 was not cited in the international search report. A copy of the document is appended hereto.

1- ARTICLE 33 (3) PCT - INVENTIVE STEP

The present application does not meet the criteria of Article 33(1) PCT, because the subject-matter of claims 1 does not involve an inventive step in the sense of Article 33(3) PCT.

1.1- Independent apparatus claim 1

The document D2, which is considered to represent the most relevant state of the art, discloses a filter for internal combustion engine liquids from which the subject-matter of claim 1 differs in that that part (10) of the system associated with the cartridge **is located within the central compartment** of this latter, and that part (111) of the system associated with the cover is dimensioned and shape to be able to be inserted into the preceding and coupled thereto, where it retains the facing end of the cartridge in the immediate vicinity of the cover.

The problem to be solved by the present invention may therefore be regarded as to propose a filter which permits to maximise the filtering surface present in the cavity of the filter housing (page 2 lines 6-12).

This is achieved by locking one of the ends of the filter cartridge in the immediate vicinity of the cover (page 3 line 5).

The solution proposed in claim 17 of the present application cannot be considered as involving an inventive step (Article 33(3) PCT) for the following reasons:

The feature "locating the snap connection system within the central compartment of the toroidal filter cartridge" is merely one of several straightforward possibilities from which the skilled person would select, in accordance with circumstances, without the exercise of inventive skill, in order to solve the problem posed (see doc. D1, fig.1; doc D3, fig. 1,4 and 5)

1.2- Dependent claims 2,7-9

Dependent claims 2,7-9 do not contain any features which, in combination with the features of any claim to which they refer, meets the requirements of the PCT in respect of inventive step.

1.3- Dependent claim 3-6

The skilled person would not regard as a normal option to include the features of the dependent claims 3-6 in the apparatus disclosed in the document D1 in order to solve the problem posed. So independent claims 3-6 meet the requirements of the PCT with respect to novelty and inventive step.

Re Item VIII

The application does not meet the requirements of Article 6 PCT, because claims 5, 6, 8 are not clear.

Claim 5 refers to the feature "predetermined angle for releasing the cartridge" which lacks antecedent basis, since it has not been defined in claims 1,2,3 and 4.

Claim 6 refers to the features "annular body", "recesses", "recess" which lack antecedent basis, since they have not been defined in claim 1.

Claim 8 refers to the feature "a part of an annular body" which lacks antecedent basis, since it has not been defined in claims 1 and 7.
